

At Clorox, we work together to make
everyday life better, every day.

Clorox and The Clorox Company Foundation are committed to building stronger communities.

At Clorox our mission is to make everyday life better, every day through our product offerings and by supporting the communities in which we do business. Clorox and The Clorox Company Foundation are committed to building stronger communities by working hand in hand with community partners such as those you will read about in the pages ahead. Our commitment dates back to the founding of our company and is the guiding principle of the foundation today.

For nearly 30 years, The Clorox Company Foundation has been supporting nonprofit organizations that work passionately and tirelessly to create healthier, vibrant communities through the various programs they provide. Our main focus has been to provide financial assistance to support programs that enhance K-12 education and youth development. We also believe it is important to preserve cultural and civic vitality through the arts.

While providing cash grants is important, we also recognize that financial resources are only a part of enriching communities. Clorox is able to invest in a stronger, better future by making community involvement an integral part of our company culture. We enthusiastically encourage and support employees to give back through volunteerism. We provide grants to organizations where our employees volunteer, and our workplace giving program matches employee contributions to nonprofits and higher education programs.

This report focuses on everyday people and their real stories. Their dedication and outstanding work are an inspiration to me personally. I think you will see how much they exemplify the dedication and outstanding work of the nonprofit organizations The Clorox Company Foundation supported in fiscal year 2009.

A handwritten signature in black ink that reads "Don Knauss". The signature is written in a cursive, flowing style.

DONALD R. KNAUSS

Chairman and Chief Executive Officer, The Clorox Company
